RATES & COMMISSIONS

wiehr.cc · hello@wiehr.cc

I offer commissioned music production and software engineering services for creative projects, businesses, and independent artists.

COMPOSER SERVICES

Composition & Scoring

Original music for films, games, theatre, dance, and other media. Cinematic, ambient, and experimental electronic compositions built around a synthetic-orchestra approach.

Selected credits include Warsaw Film School short films, physical theatre performances, and limited-edition brand campaigns.

For an estimate, share your project concept, intended mood, track count, duration, and musical direction. We'll agree on a timeline, budget, regular check-ins, and revisions.

Mixing & Mastering

Stereo mixing and mastering for independent artists, prepared for streaming platforms and their loudness standards (LUFS). Working in FL Studio, with a focus on clarity, depth, and consistent playback across systems.

Sound Design

Original sound design and synthesis for film, theatre, games, and interactive media. Covering ambient, cyberpunk, dance, drum & bass, and techno, including Foley, field recording, and sound processing.

ENGINEER SERVICES

Website Development

Custom websites built with Django, interactive frontends, and CMS backends. From portfolio websites with WebGL visualizations to music distribution platforms with release management, artist profiles, and content administration.

Full development cycle, from design to deployment, including domain, hosting, and SSL configuration.

Software Engineering

Full-stack development with Python (Django, Flask, FastAPI), React, and REST/gRPC APIs.

Services include:
- Backend and API development
- Data pipelines and ETL systems
- Third-party integrations
- Background processing with Celery

5+ years of experience building production systems, including e-commerce platforms managing 5M+ products, ML-based detection pipelines, and GDPR-compliant health-data platforms.

Cloud & Infrastructure

AWS infrastructure design and implementation using Terraform, Kubernetes, and Docker.

Experience with Lambda, S3, ECS, RDS, VPC, IAM, CI/CD, and monitoring with Grafana and Prometheus.

AWS Certified Solutions Architect and Cloud Practitioner. Reduced annual AWS costs by $100K through infrastructure optimization and lifecycle policies.
